PROFESSIONAL SUMMARY

Growth analytics professional with 8+ years of experience translating data into customer acquisition, retention, and lifecycle growth strategies across fintech, e-commerce, and digital marketing. Proven track record driving measurable business outcomes, including 20% acquisition growth, 50% churn reduction, and 18% conversion uplift, through customer segmentation, A/B experimentation, cohort analysis, and CRM-integrated targeting. Combines deep SQL/Python technical ability with a marketer's instinct for customer behaviour and growth levers. Experienced leading cross-functional analytics engagements and communicating insights to non-technical stakeholders. Seeking to bring data-driven growth strategy to a fast-moving product or marketing team.

CORE COMPETENCIES

Growth Analytics · Customer Acquisition · Retention & Churn Reduction · Lifecycle Marketing · A/B Experimentation
Customer Segmentation · Cohort Analysis · Funnel Optimization · LTV & CAC Analysis · CRM Analytics
Marketing Performance Analytics · Behavioral Modeling · KPI Frameworks · Forecasting · Stakeholder Reporting

EXPERIENCE

Business Insight Analyst Lead | **Extensodata (F1Soft International)** | Kathmandu, Nepal *Apr 2025 – Present*

- ▶ Led a team of 3 analysts on consulting engagements, scoping data deliverables and driving growth-focused insight projects from discovery through delivery.
- ▶ Designed a micro-loan eligibility scoring system (SQL + Python) used as a customer acquisition marketing tool, driving 20% growth in new customer acquisition for a fintech client.
- ▶ Built transaction categorisation and customer persona development pipelines to segment borrowers by spending behaviour, income regularity, and financial profiles; personas fed into targeted acquisition campaigns matched to borrower intent.
- ▶ Conducted statistical classification modelling on borrower behaviour and credit risk, improving loan approval accuracy by 15% and enabling data-driven product offers.
- ▶ Designed post-disbursement repayment tracking that surfaced early delinquency signals, shaping credit policy and reducing default risk, with direct downstream effect on customer lifetime value.

Marketing Analyst | **Growthzilla** | California, USA (Remote) *Jun 2024 – Mar 2025*

- ▶ Built RFM-based customer cohorts using Python and SQL to identify high-value, at-risk, and dormant segments; targeted campaigns against these cohorts lifted conversion rates by 18% and reduced customer acquisition cost (CAC) by 12%.
- ▶ Designed and executed A/B tests on email marketing campaigns (subject lines, send-time, CTA placement), producing validated recommendations that improved open and click-through rates by 20%.
- ▶ Owned end-to-end customer acquisition and retention reporting, translating weekly performance data into actionable marketing strategy recommendations for the leadership team.
- ▶ Developed lifecycle marketing dashboards tracking user engagement, activation, and retention milestones, enabling the team to identify drop-off points and prioritise re-engagement efforts.

Senior Business Intelligence Analyst | **Daraz (Kaymu Pvt. Ltd.)** | Kathmandu, Nepal *Feb 2021 – Mar 2024*

- ▶ Built and managed 15+ KPI dashboards tracking GMV, seller health, logistics, and retention for 50+ stakeholders across commercial, operations, and marketing, replacing manual spreadsheet workflows and saving 10+ hours per week.
- ▶ Developed customer and seller segmentation models (RFM, Python clustering) that reduced customer churn by 50% and sustained 90% month-on-month retention through targeted CRM campaigns.

- ▶ Built seller acquisition risk scoring and onboarding quality prediction models contributing to 75% MoM seller growth and a 65% improvement in onboarded seller quality.
- ▶ Designed time-series forecasting models for core marketplace metrics, achieving 30% higher forecast accuracy, directly enabling data-driven target setting and commercial planning.
- ▶ Partnered with category, marketing, and product teams to frame growth hypotheses, design measurement frameworks, and deliver insights that shaped campaign and category strategy decisions.

Data Analyst | **Delta Creation** | Kathmandu, Nepal

Mar 2019 – Mar 2020

- ▶ Built reporting infrastructure for finance, operations, and marketing functions; designed KPI tracking dashboards enabling performance measurement and data-informed decision-making across teams.

Digital Marketing Officer | **Janaki Technology (Khalti & Sparrow SMS)** | Lalitpur, Nepal

Jan 2017 – Nov 2018

- ▶ Set up Google Analytics tracking across digital channels; built Looker Studio dashboards to monitor campaign performance, user engagement, and traffic trends.
- ▶ Drove 20% growth in organic traffic, improved search visibility by 10%, and contributed to a 5% uplift in lead generation through structured SEO and content strategy.

SELECTED PROJECTS

Customer Transaction Segmentation & Persona Engine | *Foneloan / Extensodata*

- ▶ Engineered a transaction categorisation pipeline in Python and SQL using MCC-based mapping to classify customer spending across merchant categories, building behavioural profiles covering spending patterns, income regularity, and financial risk signals.
- ▶ Personas were ingested into the marketing stack as segmentation inputs, enabling targeted acquisition campaigns and product offers matched to borrower profiles, delivered as a reusable, scalable scoring framework.

NBA Shot Analytics (LeBron James) | *Personal Portfolio*

- ▶ Full analytics pipeline on NBA shot data: API extraction, Snowflake medallion architecture, dbt marts covering shot zones, scoring efficiency, and clutch performance; visualised in Tableau with spatial shot charts.

SKILLS & TOOLS

Analytics & Growth: Customer segmentation (RFM, clustering), cohort analysis, funnel analysis, A/B testing & experimentation, churn prediction, LTV/CAC modeling, lifecycle analytics, behavioral modeling

Marketing & CRM: Email performance analytics, acquisition analytics, retention campaigns, lifecycle targeting, campaign attribution, Google Analytics 4, Google Tag Manager, Looker Studio

Languages: SQL (CTEs, window functions, query optimisation), Python (Pandas, NumPy, Scikit-learn), PySpark

Data & BI Tools: Power BI, Tableau, Looker, Metabase · Snowflake, BigQuery, DuckDB · dbt, Airflow, Databricks, SSIS

Domains: Fintech / credit risk · E-commerce growth · Marketing analytics · Loyalty & CRM · KPI strategy

EDUCATION

B.Sc. Computer Science and Information Technology

Graduated 2016

Tribhuvan University, Kathmandu, Nepal
